

Ryan Chapel - Senior Web Developer

ryanchapel.com 425-830-8694 ryan.chapel@gmail.com 7303 Silent Creek Ave SE, Snoqualmie, WA 98065

Profile

I've spent over 8 years as a front-end web developer working on static and CMS-based websites. I specialize in responsive web design, user interaction, performant websites, and using web standards and best practices to make awesome user experiences.

I love to make websites that help people, and that users both understand and enjoy.

Experience

WEB DEVELOPER @ APTIMUS - AN APOLLO GROUP COMPANY; SEATTLE, WA – 2006-PRESENT

I'm currently creating interactive wireframes for a new website I'm lead developer on.

I previously led the charge on making University of Phoenix's current main website responsive, and continue working with peers to ensure we write scalable, clean, and standards-based code.

I also use our internal wiki to document best practices and how-tos, am a part of the developer interview team, and I'm also in charge of the office beer fund and kegerator.

SOFTWARE TEST ENGINEER @ VMC; REDMOND, WA – 2005 - 2006

I tested Xbox and Xbox 360 games before they went to production.

Education

City University of Seattle – Bachelor of Science, Computer Systems, 2006

Skills / Tools

HTML5, CSS3, Sass & Less, JavaScript / jQuery / AJAX, responsive web design, mobile development, Chrome Inspector, Adobe AEM CMS development using JSTL / JSP, maven, subversion, GitHub, Yeoman, Bower, Grunt, unix terminal, web standards, best practices, web forms, Adobe Photoshop, Sublime Text 3, and of course, Spotify. ;)
